

OFV Kjøretøydata export

Opplysningsrådet for Veitrafikken

Description of export 7 from OFV Kjøretøydata, version 1.6

Content

- 1. DESCRIPTION OF EXPORT FROM OFV KJØRETØYDATA, VERSION 1.3 3
- 2. EXPORT OVERVIEW 6
- 3. FILEFORMATS 7
- 4. TECHNICAL DATA OVERVIEW 11
 - 4.1. Driveline code (Technical id = 511)..... 14
- 5. EQUIPMENT DATA OVERVIEW 15

Changelog

Version	Date	Change	Changed by
1.0	20.10.2016	Created	KNS
1.1	25.01.2017	Changed	KNS
1.2	24.02.2017	Changed	KNS
1.3	02.01.2018	New data added	KNS
1.4	24.09.2018	New data added	KNS
1.5	04.12.2020	Updated units	KNS
1.6	08.03.2021	Update tech/equ data	KNS

Reference	Titel	Filename	Version

1. DESCRIPTION OF EXPORT FROM OFV KJØRETØYDATA

This document describes the content in files that are exported from OFV Kjøretøydata every night.

Content

The files includes all changes done until 23:59 the day before export generated date.

Files are grouped under vehiclegroup directory, which means that eg. files for “passenger” cars is located under directory 101 (vehiclegroup for passenger cars) and “commercial vehicles” is located under 311 etc.

Name

The following vehiclegroups is presented, but only available if customer has a valid subscription for it:

- 101 Passenger cars
- 311 Commercial vehicles
- 610 Light motorbike
- 620 Heavy motorbike

The following files are generated under each vehiclegroup directory and represent full data export for current year:

Filename	Content	Dependencies
VehicleGroup.csv	List of vehiclegroups	-
VehicleTechnicalCodes.csv	Description and grouping of all technical codes.	-
VehicleEquipmentCodes.csv	Description and grouping of all equipment codes	-
Vehicles_current.csv	All vehicles presented to marked current year – basedata for vehicles	-
VehiclesData_current.csv	Technical data values belonging to vehicles	Vehicles_current.csv (variantId), VehicleTechnicalCodes_current (technicalCode)
VehiclesEquipmentData_current.csv	Equipment data values belonging to vehicles	Vehicles_current.csv (variantId), VehicleEquipmentCodes_current (equipmentCode)
VehiclesEquipmentComment_current.csv	Equipment comments belonging to vehicles	Vehicles_current.csv (variantId)
VehiclesPicturePath_current.csv	Path where pictures for vehicles can be found and retrieved	Vehicles_current.csv (variantId)
VehicleEngines_current.csv	Engines belonging to each vehicle	Vehicles_current.csv (variantId)
VehicleEnginesData_current.csv	Technical data values belonging to engines	VehicleEngines_current.csv (engineId),

		VehicleTechnicalCodes_current (technicalCode)
VehicleEnginesBatteyData_current.csv	Technical data belonging to batteries	VehicleEngines_current.csv (batteryId), VehicleTechnicalCodes_current (technicalCode)

The following files are identical in content with does above, but represent the difference on daily base.

Filename	Comments
Diff_Vehicles_current.csv	Status value for each vehicle describes if the vehicle is NEW, EXPIRED or CHANGED. In case CHANGED it means that a another vehicle has EXPIRED and a changed version has arrived (typically a new revision "+1" and in some cases modelyear and revision change – see <i>description of RevisionCode for more details.</i>). In case NEW a new vehicle has arrived (typically revision "0")
Diff_VehiclesData_current.csv	
Diff_VehiclesEquipmentData_current.csv	
Diff_VehiclesEquipmentComment_current.csv	
Diff_VehiclesPicturePath_current.csv	
Diff_VehicleEngines_current.csv	
Diff_VehicleEnginesData_current.csv	
Diff_VehicleEnginesBatteyData_current.csv	

Format

Content in files is generated as semicolon-separated with CRLF and Unicode characters.

Identification

Identification of each vehicle is defined by separate fields that combined gives a unique vehicle.

That unique vehicle also has an internal "variantId" which is unique – variantId is used as key to bind technical-, equipment- and enginedata together.

Identification is defined by the following fields and order - named as "StructureNo:

- BrandCode (Merke)
- ModelCode (Modell)
- VariantCode (Variant)
- ModelYear (Modellår)
- RevisionCode (Revisjon)

BrandCode:

- Under normal circumstances the brand code used comes from Norwegian Public Road Administration (NPRA), but in some cases OFV has defined their own brand code. This can be in cases where NPRA has not defined a brand code or when brands has been combined.

ModelCode:

- Model code increases under each brand whenever a new model arrives.

VariantCode:

- Variant code increases under each model whenever a new variant arrives.

ModelYear:

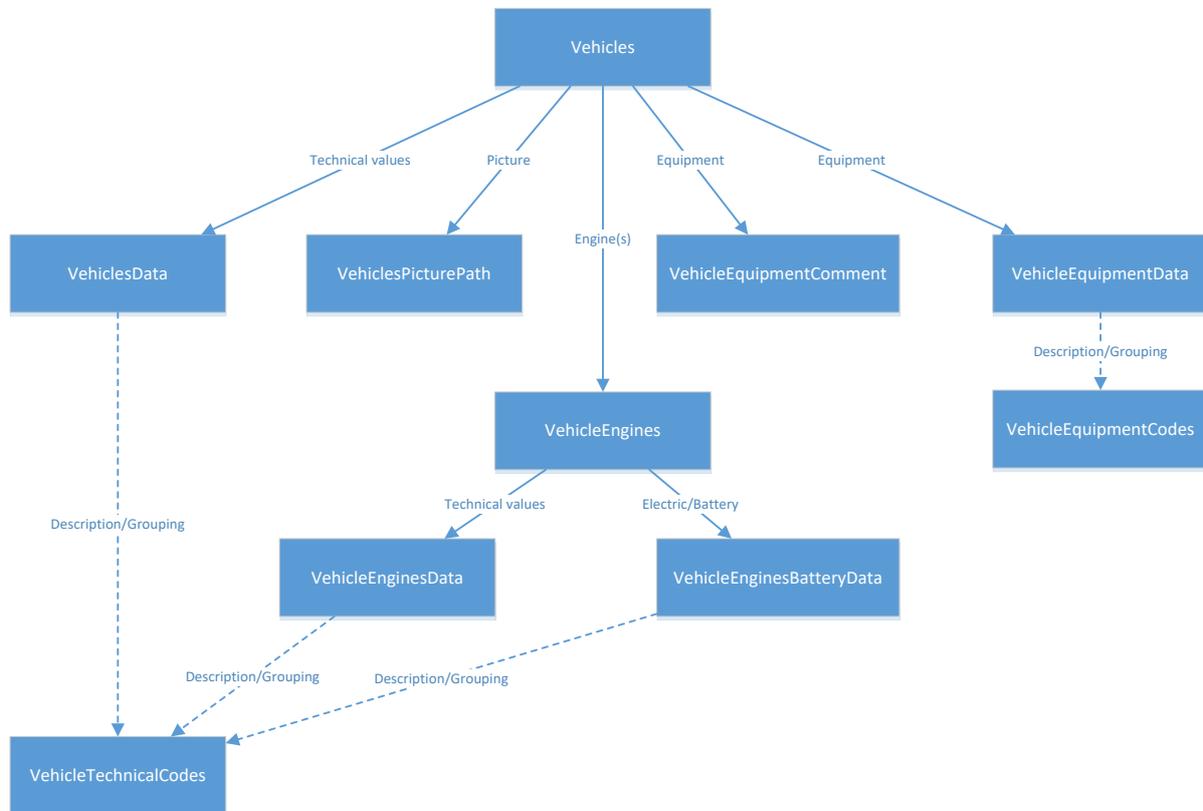

- ModelYear can represent both prior years, current year and next year. This is varying for each brand and model depending on how often the producer introducing new vehicles. In some cases next year vehicles is already presented at summertime in current year.

RevisionCode:

- RevisionCode is set by system and increases by one under BrandCode-ModelCode-VariantCode-ModelYear.
- First revision is "0" and means that it is a new vehicle.
- RevisionCode increases by every change done to a vehicle, and always replaces the revision before – the vehicle replaced has *expired*.
 - Sometimes ModelYear also changes and triggers a creation of *expired* vehicle and a *changed* vehicle in the diff-file.
 - It's possible to find expired changed vehicles by compare brandcode, modelcode and variantcode – these will be identically while modelyear and/or revisioncode are different.

2. EXPORT OVERVIEW

Binding between data in files is shown in figure.

Vehicles is a list off all vehicles presented to market in current year – only ONE entry for each vehicle.

VehiclesData is a list of values for each vehicle, and each value has a code that refers to a technical specification and grouping, which is to find in *VehicleTechnicalCodes*.

VehiclePicturePath has an entry for each vehicle and has a url-reference to pictures of the specific vehicle (se fileformat-section to get list of available picturefiles).

VehicleEquipment is a list of values for each vehicle, and each value has a code that refers to a equipment specification and grouping, which is to find in *VehicleEquipmentCodes*.

VehicleEquipmentComment has an entry for some vehicles (not all vehicles has an equipmentcomment) and is a text description referring to offers of equipment or bundling.

VehicleEngines has ONE or MORE entry for each vehicle (hybrid- and electric-cars offen has more than one engine). If an engine is driven by electricity, there will be a reference to a batterypack.

VehicleEnginesData is a list of values for each engine, and each value has a code that refers to a technical specification and grouping, which is to find in *VehicleTechnicalCodes*.

VehicleEnginesBatteryData is a list of values for each battery, and each value has a code that refers to a technical specification and grouping, which is to find in *VehicleTechnicalCodes*.

3. FILEFORMATS

Each file include different fields and format.

All fields in bold should be used as primary key.

VehicleGroups.csv

Name	Type	Max_length	Comment
VehicleGroupCode	short		Code
VehicleGroup	string	50	Name of vehiclegroup

This file is not needed and is only provided as an overview of defined vehiclegroups!

VehicleTechnicalCodes.csv

Name	Type	Max_length	Comment
TechnicalGroupCode	int		Group code (technical codes is grouped in defined groups)
TechnicalGroupName	string	50	Name of group (eg. Vekt)
TechnicalCode	int		Code
TechnicalName	string	50	Name of technical data (eg. Egenvekt uten fører)
ValueType	string	20	Type of the data - Number, yes-no or text
Unit	string	20	Unit if type is number (eg. Kg)

VehicleEquipmentCodes.csv

Name	Type	Max_length	Comment
EquipmentGroupCode	int		Group code (equipment codes is grouped in defined groups)
EquipmentGroupName	string	50	Name of group (eg. Lys)
EquipmentCode	int		Code
EquipmentName	string	50	Name of equipment data (eg. LED Hovedlys)

Vehicles_current.csv

(Diff_Vehicles_current.csv)

Name	Type	Max_length	Comment
StructureNo*	string	50	Unique number
VariantId*	int		Unique vehicle identification
VehicleGroupCode	short		Code
VehicleGroup	string	50	Name of vehiclegroup
BrandCode	int		
ModelCode	short		

VariantCode	int		
ModelYear	short		
RevisionCode	int		
ModelSplitCode	short		Code for Modelsplit
BrandName	string	50	Name of brand (eg. BMW)
ModelName	string	50	Name of model (eg. 5-Serie)
ModelGeneration	string	50	Name of model generation (eg. "7 (G30-G31)")
ModelSplitName	string	50	Name of model split (eg. 550i xDrive)
VariantName	string	255	Name of variant (eg. Gran Turismo)
Segment	string	50	Segment name (eg. Store biler)
ChassisShortName	string	3	Shortform of chassis (eg. COM)
Chassis	string	50	Name of chassis (eg. Combi-Coupè)
TransmissionShortName	string	3	Shortform of transmission (eg. AUT)
Transmission	string	50	Name of transmission (eg. Automat)
EnergySourceShortName	string	21	Shortform of energysource (eg. B)
EnergySource	string	50	Name of energysource (eg. Bensin)
TotalEngines	int		How many engines does vehicle have - hybrid can have 2 or more
EmissionStandard	string	50	Eurocap std. (eg. Euro 6)
ImporterPrice	decimal	9	Eg. 1403700.00
CurrencyCode	string	3	ONLY NOK (Norwegian kroners)
Approved	DateTime		The date when OFV approved this vehicle
Transferred	DateTime		The date when vehicle has been replaced by another or no longer is presented to marked
Status	string	7	Only used in file Diff_Vehicles_current.csv! NEW - new vehicle EXPIRED - no longer presented to marked or replaced by another revision CHANGED - new revision of an expired vehicle

* Can also be used as primary key

VehiclesData_current.csv

(Diff_VehiclesData_current.csv)

Name	Type	Max_length	Comment
VariantId	int		VariantId data belongs to
TechnicalCode	int		Code

Value	string	100	Value (eg. 1460, Bak or Ja etc.) - combine with data in VehicleTechnicalCodes.csv
-------	--------	-----	---

VehiclesEquipmentData_current.csv

(Diff_VehiclesEquipmentData_current.csv)

Name	Type	Max_length	Comment
VariantId	int		VariantId data belongs to
EquipmentCode	int		Code
Value	string	50	Value (eg. Ja, Nei, 6900.00 or Foran etc.) - combine with data in VehicleEquipmentCodes.csv

VehiclesEquipmentComment_current.csv

(Diff_VehiclesEquipmentComment_current.csv)

Name	Type	Max_length	Comment
VariantId	int		VariantId data belongs to
Comment	string	MAX	Comment to equipment - typically description of equipment packs or offers

VehiclesPicturePath_current.csv

(Diff_VehiclesPicturePath_current.csv)

Name	Type	Max_length	Comment
VariantId	int		VariantId data belongs to
PathToPictures*	string	MAX	URL where pictures can be retrieved

* Pictures available

- For cars
 - Back.jpg
 - Front.jpg
 - Front_1.jpg
 - Interior.jpg
 - Side.jpg
- For motorbikes
 - Bilde_1.jpg
 - Bilde_2.jpg
 - Bilde_3.jpg
 - Bilde_4.jpg

VehicleEngines_current.csv

(Diff_VehicleEngines_current.csv)

Name	Type	Max_length	Comment
VariantId	int		VariantId data belongs to
EngineId	int		Unique engine identification
EngineTypeCode	int		Code
EngineType	string	50	Type of engine (eg. Forbrenningsmotor or elektrisk)
FuelCode	int		Code
FuelName	string	50	Type of fuel (eg. Bensin)
BatteryId	int		Unique identification (use to find batterydata)
BatteryTypeCode	int		Code
BatteryType	string	50	Type of battery (eg. Litium Ion)

VehicleEnginesData_current.csv

(Diff_VehicleEnginesData_current.csv)

Name	Type	Max_length	Precision
EngineId	int		EngineId data belongs to
TechnicalCode	int		Code
Value	string	100	Value (eg. 145, Hovedmotor or Nei etc.) - combine with data in VehicleTechnicalCodes.csv

VehicleEnginesBatteyData_current.csv

(Diff_VehicleEnginesBatteyData_current.csv)

Name	Type	Max_length	Precision
BatteryId	int		BatteryId data belongs to
TechnicalCode	int		Code
Value	string	100	Value (eg. 230, Ja or Nei etc.) - combine with data in VehicleTechnicalCodes.csv

4. TECHNICAL DATA OVERVIEW

Technical data are dynamic and new value definitions will be added as they will be available in marked and adopted by OFV.

The file **VehicleTechnicalCodes.csv** will hold these values and should be investigated for new values.

Below list is generated 08.03.2021 as an example (142 available technical definitions):

TechnicalGroupCode	TechnicalGroupName	TechnicalCode	TechnicalName	ValueType	Unit
1	Motordata total	101	Motorytelse total	Number	kW
1	Motordata total	102	Motorytelse total	Number	hk
1	Motordata total	105	Motorytelse total (30 min)	Number	kW
1	Motordata total	106	Motorytelse total (30 min)	Number	hk
1	Motordata total	103	Dreiemoment total	Number	Nm
1	Motordata total	104	Drivhjul total	Text	
11	Garanti/service	1101	Garanti	Number	år
11	Garanti/service	1102	Garanti, km-begrensning	Number	km
11	Garanti/service	1103	Garanti mot rust	Number	år
11	Garanti/service	1104	Garanti lakk	Number	år
11	Garanti/service	1105	Serviceintervall	Number	km
11	Garanti/service	1106	Service ved behov	Yes-No	
2	Motordata	213	Motorindex	Number	
2	Motordata	215	Motortype	Text	
2	Motordata	220	Kjøling	Text	
2	Motordata	214	Turbo/Kompressor	Text	
2	Motordata	201	Sylindervolum	Number	cm ³
2	Motordata	202	Sylindre antall	Text	
2	Motordata	212	Kamaksler, antall	Number	
2	Motordata	211	Ventiler, antall	Number	
2	Motordata	203	Boring	Number	mm
2	Motordata	204	Slaglengde	Number	mm
2	Motordata	205	Kompresjon	Text	
2	Motordata	206	Motorytelse	Number	kW
2	Motordata	207	Motorytelse	Number	hk
2	Motordata	221	Motorytelse (30 min)	Number	kW
2	Motordata	222	Motorytelse (30 min)	Number	hk
2	Motordata	209	Turtall ved maks effekt	Number	o/min
2	Motordata	208	Dreiemoment	Number	Nm
2	Motordata	210	Turtall ved maks dreiemoment	Number	o/min
2	Motordata	216	Stop/start	Yes-No	
2	Motordata	218	Sylinderutkobling	Yes-No	
2	Motordata	219	Energigjenvinning	Yes-No	
2	Motordata	217	Lademotor	Yes-No	

2	Motordata	301	Partikkelfilter	Yes-No	
12	Batteridata	1201	Spenning	Number	Volt
12	Batteridata	1204	Ekstern lading	Yes-No	
12	Batteridata	1205	Ladespenning	Number	Volt
12	Batteridata	1206	Ladetid	Number	Timer
12	Batteridata	1207	Ladetid hurtiglading	Number	Timer
12	Batteridata	1202	Kapasitet	Number	kWh
12	Batteridata	1208	Vekt	Number	kg
12	Batteridata	1209	Batterileie, pris 10 000 km/år:	Number	kr
12	Batteridata	1211	Batterigaranti	Number	km
12	Batteridata	1212	Batterigaranti	Number	år
12	Batteridata	1213	Garantert restkapasitet	Number	%
12	Batteridata	1214	Maksimal ladefart	Number	kW
3	Miljødata	302	CO2-klassifisering	Text	
3	Miljødata	311	Strømforbruk NEDC	Number	kWh/100km
3	Miljødata	1203	Rekkevidde NEDC	Number	km
3	Miljødata	320	Strømforbruk WLTP	Number	kWh/100km
3	Miljødata	1210	Rekkevidde WLTP	Number	km
3	Miljødata	312	Forbruk 90 km/t	Number	l/100km
3	Miljødata	313	Forbruk 120 km/t	Number	l/100km

8	Mål	812	Antall sitteplasser	Number	
8	Mål	809	Tankvolum	Number	liter
8	Mål	810	Tankvolum reserve	Number	liter
10	Vekt	1001	Egenvekt uten fører	Number	kg
10	Vekt	1002	Nyttelast	Number	kg
10	Vekt	1003	Tillatt totalvekt	Number	kg
10	Vekt	1004	Maksimal tilhengervekt	Number	kg
10	Vekt	1005	Maksimal taklast	Number	kg
10	Vekt	1006	Maksimal vogntogvekt	Number	kg

4.1. DRIVELINE CODE (TECHNICAL ID = 511)

Gives a short description of engine order of driveline (see below list):

Kortnavn	Navn
B	Bensin
BE85	Bensin/E85
BE85E	Bensin/E85/Elektrisitet
BE85EL	Bensin/E85/Elektrisitet/Ladbar
BE	Bensin/Elektrisitet
BEL	Bensin/Elektrisitet/Ladbar
BG	Bensin/Gass
BGE	Bensin/Gass/Elektrisitet
BGEL	Bensin/Gass/Elektrisitet/Ladbar
D	Diesel
DE	Diesel/Elektrisitet
DEL	Diesel/Elektrisitet/Ladbar
E	Elektrisitet
E	Elektrisitet
EB	Elektrisitet/Bensin
EBE85	Elektrisitet/Bensin/E85
EBE85L	Elektrisitet/Bensin/E85/Ladbar
EBG	Elektrisitet/Bensin/Gass

EBGL	Elektrisitet/Bensin/Gass/Ladbar
EBL	Elektrisitet/Bensin/Ladbar
ED	Elektrisitet/Diesel
EDL	Elektrisitet/Diesel/Ladbar
EG	Elektrisitet/Gass
EGB	Elektrisitet/Gass/Bensin
EBGL	Elektrisitet/Gass/Bensin/Ladbar
EGL	Elektrisitet/Gass/Ladbar
EH	Elektrisitet/Hydrogen
EHL	Elektrisitet/Hydrogen/Ladbar
G	Gass
GB	Gass/Bensin
GBE	Gass/Bensin/Elektrisitet
GBEL	Gass/Bensin/Elektrisitet/Ladbar
GE	Gass/Elektrisitet
GEL	Gass/Elektrisitet/Ladbar
H	Hydrogen
HE	Hydrogen/Elektrisitet
HEL	Hydrogen/Elektrisitet/Ladbar

Example:

When drivelinecode is **EBL** it means the electrical engine (E) is master, gasoline engine (B) is help/charge-engine and this one is a chargeable Plug-in hybrid (L).

When drivelinecode is **BEL** it means the gasoline engine (B) is master, electric engine (E) is helper-engine and this one is a chargeable Plug-in hybrid (L).

5. EQUIPMENT DATA OVERVIEW

Equipment data are dynamic and new value definitions will be added as they will be available in marked and adopted by OFV.

The file **VehicleEquipmentCodes.csv** will hold these values and should be investigated for new values.

Below list is generated 08.03.2021 as an example (201 available equipment definitions):

EquipmentGroupCode	EquipmentGroupName	EquipmentCode	EquipmentName
1	Lys	2	Xenon/Bi-Xenon hovedlys
1	Lys	105	LED hovedlys
1	Lys	4	Svingbare hovedlys
1	Lys	106	Dynamisk lysspredning hovedlys
1	Lys	107	Automatisk tenning hovedlys
1	Lys	7	Automatisk fjernlysdimmer

1	Lys	81	Nattsynassistent
1	Lys	3	Kurve/tåkelys foran
1	Lys	6	Aktive kurvelys
1	Lys	120	LED kurve/tåkelys
1	Lys	108	LED kjørellys
1	Lys	1	Frontlys, høydejusterbare
1	Lys	5	Lyktespylere
1	Lys	18	Regnsensor
8	Klima	28	Klimaanlegg, manuelt
8	Klima	29	Klimaanlegg, automatisk
8	Klima	27	Klimaanlegg, antall soner
8	Klima	30	Pollenfilter
8	Klima	31	Ekstravarmer, kjørevvarmer
8	Klima	33	Parkeringsvarmer
8	Klima	121	Parkeringsvarmer m/fjernstyring
8	Klima	34	Frontrute, oppvarmet
8	Klima	112	Spylerdyser, oppvarmede
3	Innvendig utstyr	40	Vindusheiser elektriske
3	Innvendig utstyr	32	Turteller
3	Innvendig utstyr	35	Head-Up display
3	Innvendig utstyr	41	Kjørekomputer
3	Innvendig utstyr	148	Kjørebok
3	Innvendig utstyr	149	Ferdskriver
3	Innvendig utstyr	39	Dekktrykksovervåker
3	Innvendig utstyr	42	Fartsholder, normal
3	Innvendig utstyr	113	Fartsholder med fartsbegrenser
3	Innvendig utstyr	43	Fartsholder, dynamisk
3	Innvendig utstyr	36	Innvendig åpning av tanklokk
3	Innvendig utstyr	38	Innvendig åpning av koffert
2	Utvendig utstyr	9	Metallic lakk
2	Utvendig utstyr	109	Perlemor/brilliant lakk
2	Utvendig utstyr	8	Lakkerte støtfangere
2	Utvendig utstyr	10	Lakkerte utvendige speil
